PROGRAM DESCRIPTION AND PHILOSOPHY

The Partial Hospitalization Program (PHP) at Arbour Counseling Services of Woburn consists of two tracks: adult psychiatry and dual diagnosis. PHP is a highly structured short-term intensive treatment program that represents an important part of the continuum of care. The PHP is offered Monday through Friday.

Partial hospitalization either continues the evaluation and stabilization process initiated on an inpatient unit, or functions as a diversion from hospitalization for patients who require a highly structured treatment program to prevent decompensation and admission. Patients receive individualized, focused, goal-oriented treatment to facilitate stabilization of symptoms in a less restrictive, non-institutional environment.

The overall program philosophy incorporates a disease and recovery model for both psychiatric and substance disorders that emphasizes:

- Education to patients and families regarding the nature of the disorders that precipitated admission.
- Access to treatment and recovery, to stabilize acute symptoms and to promote progress with continued rehabilitation and growth.
- Acquisition of specific cognitive and behavioral skills for managing symptoms and feelings, as well as for development of new social supports.
- Identifying and engaging behavioral and attitude changes that are necessary to establish recovery. Patients take an in-depth look at the process of relapse, and develop strategies to effectively manage the relapse process as it occurs.

The Partial Hospitalization Program at Arbour Counseling Services of Woburn is a voluntary, short-term treatment program that offers a variety of

therapeutic activities in a group setting. Patients receive intensive treatment and supervision for the hours they spend in the partial hospitalization program, but they maintain independent functioning and ties with home, family, and community.

PROGRAM COMPONENTS

- Comprehensive clinical evaluation, including psychiatric and psychopharmacological assessment
- Individual therapy
- Comprehensive group program
- Psychopharmacology as needed
- Psychoeducation
- Family counseling
- Expressive therapy
- Case management to reinforce behavior and aftercare plans that have been established.

PHP TREATMENT TEAM

With the treatment team, patients establish short-term treatment goals that can be accomplished during their stay in the program. Overall treatment is focused on stabilizing acute symptoms.

The partial hospitalization staff is a professional, multi-disciplinary team. In addition to a clinical manager, the staff includes a psychiatrist, social worker, substance abuse specialist, a nurse, and an expressive arts therapist.

Patients are assigned a psychiatrist and a case manager who work with them throughout their admission. This team coordinates all aspects of each patient's care and meets with the patient in groups as well as individually. All clinical information is communicated to the partial hospitalization treatment team and to the patient's outpatient behavioral health providers.
